

- Sub A1*
1. An agglomeration/granulation method for creating a fortified mulch comprising;  
adding paper fibers to a pin mixer;  
adding NPK fortifiers and a binding agent before or at said mixer;  
drying contents of said mixer.
  2. The method of claim 1 wherein the pin mixer is replaced with a pan pelletizer.
  3. The method of claim 1 wherein the pin mixer is replaced with a paddle mixer.
  4. The method of claim 1 wherein the pin mixer is replaced with a drum granulator.
  5. The method of claim 1 wherein said pin mixer has a double helix pin arrangement.
  6. The method of claim 1 wherein said paper fibers are comprised of a by-product of a paper making process.
  7. The method of claim 1 wherein said paper fibers are replaced with sewage sludge.
  8. An agglomerated/granulated mulch product that is comprised of NPK fortifiers and paper fibers.
